

## BIZARBOTS REGISTRATION FORM

This team functions to further the interest in STEM in the youth of Holbrook. We accomplish this through the construction, design, and programming of robots.

This is also an opportunity to develop self-confidence and pride in their intelligence. At the Bizarbots, we firmly believe that every young mind is a brilliant one, and we want to instill that belief in the students of Holbrook. By allowing students to have free reign over the design of their creations, they can further develop their creativity and think outside of the box. They will have guidance from mentors and members of the Bizarbots whenever it's needed, but they will be able to think independently as well.

Students are required to maintain a GPA of 2.8. If a student falls below this standard, they will be placed under probation and will not be able to attend robotics on a regular basis until they regain the standard we set. We will collect a copy of all report cards and progress reports throughout the school year. This is mandatory in order to remain on the team. We will assist all students in schoolwork if needed or asked.

If a student has three or more teacher detentions a term, they will be placed on probation. If a student receives an office detention, they will be placed on probation. If a student is suspended, their membership status will be reviewed by the board of directors. If a student intentionally endangers or threatens a student or mentor in any way, their membership will be reviewed by the board of directors.

Students are required to log at least 30 hours to qualify for travel. Additional hours will be used to place students on a "priority list" in case we are required to cut the amount of students able to travel. Typically, the top 20 students will be able to travel with the team. Students must log their hours on our website, and the hours must be approved by a mentor or officer to be considered valid.

Students are required to raise at least \$500 in order to qualify for travel. Similarly to hours, additional hours will be used to prioritize students for travel. There will be fundraising opportunities throughout the year, including cookie dough, Yankee Candle, and the auction. Students are required to provide at least one auction item.
